Northwind Analytics - Compensation Philosophy (FY2026)

Principles
We pay at the 60th percentile of the market for the relevant talent pool and location, and we review the benchmark twice a year. Pay decisions are based on the band for the role, not on negotiation leverage.

Bands and progression
Every role maps to a band from B1 to B6. Movement within a band reflects sustained performance; movement between bands requires a promotion case that is reviewed in calibration.

Bonus
Bonus targets range from 5 percent of base at B1 to 40 percent at B6. Company performance is weighted 70 percent and individual performance 30 percent.

Equity
Equity grants are made at B4 and above on joining and on promotion, with a four year vest and a one year cliff.

Off-cycle adjustments
Off-cycle adjustments above 8 percent require People leadership and Finance approval, and are reported to the compensation committee each quarter.

Confidentiality
Individual compensation is confidential. Managers may discuss bands and the reasoning behind a decision, never another employee’s figure.
