Northwind Analytics - Company Overview

Who we are
Northwind Analytics builds decision intelligence software for mid-market retailers. About 480 people work across Berlin, London, Dubai and Singapore, and roughly a third of the company works remotely.

What we sell
The platform combines demand forecasting, inventory optimisation and assortment analytics. Starter and Growth are self-service subscriptions; Enterprise agreements are quoted annually with a services component.

How we are organised
Engineering 180 people, Sales 110, Customer Success 70, People 30, Finance 25, Legal and Compliance 12, Operations the remainder.

Certifications and commitments
SOC 2 Type II audited annually. ISO 27001 certified. Data processing addenda are signed with every vendor that touches customer data.

Where to find things
The employee handbook is published to all staff. Department handbooks, budgets and legal registers are restricted to the owning team and to leadership.
